## CONSTRUCTION

- Frame: 4" deep channel, 18 GA Galvanized Steel
- Blades: 4" deep, $45^{\circ}$ angle, 18 GA Galvanized Steel
- Screen: 1/2" Mesh x 19 GA Galvanized Steel when indicated
- Finish: Mill
- Riveted and/or welded, with drip lip, jamb, and sill flanges when indicated
- Minimum Panel Size: 12" x 12", Maximum Panel Size: 96 " x 96 "
- Undersized $1 / 2$ " in A \& B dimensions providing $1 / 4$ " perimeter clearance
- Approximate shipping weight is: $6 \mathrm{lb} . /$ square foot
- Louvers larger than max require field assembly of smaller sections

## FEATURES

- Free Area 42.3\%, Water Penetration 0.01 oz at 800 FPM free area velocity, Pressure Drop 0.13 in wg at 800 FPM and 5,408 SCFM
- Economical galvanized steel construction

## Suggested Specification

Furnish and install louvers as hereafter specified where shown on plans or as described in schedules. Louvers shall be stationary straight blade type entirely contained within a 4" frame. Louver components (heads, jambs, sills, blades and mullions) shall be factory assembled by the louver manufacturer. Louver sizes too large for shipping shall be built up by the contractor from factory assembled louver sections to provide overall sizes required. Louver design shall limit span between visible mullions to 8 feet and shall incorporate structural supports required to withstand a wind load of 20 pounds per square foot equivalent of a 90 MPH wind. (Specifier may substitute any loading required).

Louvers shall be R\&S Model FG-4004 with construction as follows:
FRAME: 18 GA galvanized steel
BLADES: 18 GA galvanized steel positioned at 45 degrees on $4-1 / 2^{\prime \prime}$ centers
SCREEN: 19 GA galvanized steel $1 / 2^{\prime \prime}$ mesh screen
FINISH: Select finish from baked polyester (powder coat), Kynar, anodized, or mill with touch-ups on welds
